Subject: Paid Engineering or GIS Internship Opportunities

Dear Department Chair:

Each fiscal year (October 1 to September 30) the City of Weston funds internships in our Public Works/Engineering Department. We currently have projects that are well suited for students pursuing degrees and are interested in gaining valuable experience in the following areas/disciplines:

Civil Engineering; Electrical Engineering; Mechanical Engineering or GIS/Geography.

What will interns gain from this program?

• Knowledge of engineering design, construction and operation of city facilities;
• Experience in the preparation and review engineering reports and studies;
• Knowledge of real-world application of GIS & GPS data collection;
• Experience in practical & effective landscape design and maintenance;
• An understanding of asset management and its related activities;

Schedule and Stipends

We value and appreciate student interns and go the extra mile to make sure they receive a learning experience that fits their career goals. The interns are expected to work between 16 and 29 hours per week on a flexible schedule that fits their class schedule. Funding for the internship program is provided to our contract partner, Calvin Giordano & Associates (CGA) and allows for stipends of $16/hour and $18/hour for undergrad and graduate students respectively. Interested students can submit resumes to Amen Abdou, CGA’s internship coordinator based in Weston at aabdou@westonfl.org with the subject line “Engineering Intern – City of Weston”.

Sincerely,

CITY OF WESTON

Karl Thompson, P.E.
Assistant City Manager / COO
